DETAILED ACTION

Appeal

1. Applicant's appeal brief is noted. The final rejection is withdrawn and a new grounds of rejection based on new prior art is entered as follows.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 23 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,526,242 to Mathielii et al.

The Mathielii '242 patent discloses a drill barrel (see Fig. 1) having a proximal end and a distal end for excavating a shaft. The drill barrel comprises a barrel portion (1, 8) being substantially hollow and substantially open at its proximal end (8). A downhole hammer drill (2) is disposed substantially within the barrel portion near the barrel portion's periphery.

Allowable Subject Matter

4. Claims 24, 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 1-22, 26-41 are allowed.

Art Unit: 3671

Response to Arguments

6. Applicant's arguments with respect to claim 23 have been considered but are moot in view of the new ground(s) of rejection.

The Mathielii '242 patent clearly discloses each element disputed by Applicant in his Appeal Brief. The purpose of Mathielii's substantially hollow and open barrel is the same as that of Applicant's barrel. Compare Appeal Brief, page 2, with Mathielii, col. 5, lines 16-23.
